2010 North Carolina State Health Plan Preferred Drug List

Please take this list with you to every doctor visit and save money when your doctor prescribes lower-cost generics.

medco[®]

Effective July 1, 2010

What is a preferred drug list?

A preferred drug list is a list of cost-effective medications covered by your prescription drug plan. The North Carolina State Health Plan preferred drug list has been compiled with guidance from a committee of North Carolina physicians and pharmacists organized by the State Health Plan. It includes medications made by most pharmaceutical manufacturers and for a variety of conditions.

Using generic or preferred medications can help you save money on your prescriptions. When you use a medication on the preferred list, your copay (for up to a 30-day supply) will be:

Tier 1/Lower-cost generic drugs	\$10
Tier 2/Preferred brand-name drugs without a generic available	\$35
Tier 3/Non-preferred brand-name drugs without a generic available	\$55

What are my copays?

	(Up to a 30-day supply)	(31– 60-day supply)	(61–90-day supply)
Tier 1/Lower-cost generic drugs	\$10	\$20	\$30
Tier 2/Preferred brand-name drugs without a generic available	\$35	\$70	\$105
Tier 3/Non-preferred brand-name drugs without a generic available	\$55	\$110	\$165
Specialty Drugs*	25% coinsurance up to \$100 for each 30-day supply.		

Brand-name drugs with a generic available—Members must pay the generic copay plus the difference between the Plan's cost of the brand drug and the Plan's cost of the generic drug.

*Specialty Drugs are medications that are often used to treat complex diseases, require special administration, dosing and handling, and typically prescribed by a specialist provider and are high in cost. For a complete listing of Specialty Drugs, please visit www.shpnc.org and click on "Pharmacy."

Why should I use generic drugs?

Ask your doctor to authorize generic substitution whenever a generic alternative is available. You will save money using generic drugs, because the copay is \$10 for a 30-day supply.

Food and Drug Administration (FDA) approved generic drugs, like brand-name drugs, must meet established FDA standards of quality and purity to help ensure their safety and effectiveness. Generic medications have the exact same active ingredients as their brand-name counterparts, and they are equal in strength and dosage. Sometimes drug manufacturers use different inactive ingredients, such as fillers and dyes, to provide a drug's shape, color, size and taste.

By prescribing generic and preferred brand-name medications, your doctor can help you save money. Remember to take this booklet with you each time you visit your doctor.

Also be sure to shop around for your generic prescriptions. The **Medco Pharmacy** (the State Health Plan's mail-order pharmacy) and many retail pharmacies now offer certain generics for \$10 for a 90-day supply. Each pharmacy has a unique program with a different list of covered generic medications. Be sure to check the list of discounted generics and current prices at each pharmacy to see if the generic you are taking is offered at the discounted rate.

State Health Plan members have access to **My Rx Choices**[®], a powerful tool to help you save money on your prescription drug costs. All you need to do is to visit www.shpnc.org and click on "Pharmacy." Then follow the link on this page to the Medco web site. If you are a first-time visitor to www.medco.com, please take a moment to register. Once you log on to www.medco.com and follow the registration instructions, you can click on **My Rx Choices**[®] to begin looking for opportunities to save money on your prescription drugs. **My Rx Choices**[®] will provide you with cost-saving alternatives to medications you already take, as well as medications you may take in the future. Those alternatives may include generic equivalents, generic alternatives, lower-cost brand-name alternatives, over-the-counter medications or, in some cases, using the **Medco Pharmacy** (your mail service pharmacy option).

If you do not have access to the Internet, you may call Medco Member Services at **1 800 336-5933** and a Medco Member Services representative or pharmacist can review your **My Rx Choices**[®] savings opportunities with you over the phone.

Please note: This preferred drug list is not a complete list of preferred drugs. In some cases, **the State Health Plan may have certain coverage limits. Some drugs require prior authorization or may be subject to quantity limits.** In certain rare instances, a drug may be in the highest copay tier but may be preferred in a step therapy program. Refer to your benefit materials or call Medco Member Services at **1 800 336-5933** for specific coverage information. This list is subject to change.

The information contained in this guide was current at the time of printing and is subject to change without notification. Please visit www.shpnc.org or call Medco Member Services at **1 800 336-5933** to receive information regarding your prescription drug benefit.

The information contained in this guide was current at the time of printing and is subject to change without notification. An updated Preferred Drug List is placed on the State Health Plan's web site (www.shpnc.org) on a quarterly basis. Please consult the web site for the most up to date edition of this list. In some cases, the Plan may have certain coverage limits. These limits may include requiring prior authorization and/or placing quantity limits on specific drugs. In certain rare instances, a drug may be in the highest copay tier but may be preferred in a step therapy program. Please refer to your benefit materials for more information.

If you have questions about your prescription drug benefit, visit www.shpnc.org or call Medco Member Services at 1 800 336-5933.
